FOLLOW THE DEAD

From their roots as a '60s psychedelic band to their current status as a '90s legend, the Grateful Dead have survived and flourished for decades because of their original sound and their appeal on the road. From the mid-'60s to today, with only one break in the '70s, the Grateful Dead have traveled around the country and around the world to play to throngs of faithful followers. The excitement of their live shows appeals to Dead Heads young and old and at every age in between—one-time hippies and middle-aged managers, teens and young adults, grandparents and grandchildren. For an amazing range of people, the Dead on the road is the best show anywhere.

The official birth date of the Grateful Dead is reckoned as June 7, 1965, the day Phil Lesh joined Jerry Garcia, Bob Weir, Bill Kreutzmann and Ron Pigpen McKernan in an electric band then called the Warlocks. The group came out of Palo Alto, California, playing bars and pizza parlors throughout the San Francisco Bay Area. The Warlocks soon joined up with another band, the Merry Pranksters, and became part of a '60s phenomenon known as the Acid Tests—all-night parties fueled by LSD and psychedelic music. Later that same year, the Warlocks became the Grateful Dead.

In 1966, the Dead moved to a large rooming house in the Haight-Ashbury district of San Francisco and often gave free concerts to big crowds in nearby Golden Gate Park. The music scene was burgeoning in San Francisco through such legendary venues as Bill Graham's Fillmore Auditorium and Family Dog's Avalon Ballroom. The Grateful Dead honed their singular sound and performance style in those heady days of the Summer of Love and the Human Be-In, as their reputation and fans grew. Their first album, *Grateful Dead*, debuted in March 1967. That summer they went on the first of their road tours outside California. In 1968, they moved out of the Haight to Marin County and drummer Mickey Hart joined the band.

Over the following decades the Dead have grown through ups and downs and emerged as the only psychedelic band to survive into the '90s. In the early 1970s, they were performing more than ever before but suffered serious financial difficulties through management problems. Not to be beaten, they produced two of their best albums—*Workingman's Dead* and *American Beauty*—with many original songs by lyricist Robert Hunter written in blues, folk and country music styles. In 1971, the Dead recorded their first gold record, a two-record set titled *Grateful Dead* and known for its skull and roses cover art. Mickey Hart left the band for a period and Pigpen was in deteriorating health, forcing him to miss some shows. So they signed on Keith Godchaux to play keyboard. In 1972, the band toured Europe and in 1973 they set up their own recording and distribution label. Tragically, Ron Pigpen McKernan died on March 8, 1973, at age 27.

Although three-fourths of their income came from live performances, the Dead took a break from performing on the road from October of 1974 until mid-1976. Their record company was going under and the cost of transporting the band and its 25 tons of equipment was becoming an enormous burden. They needed time off to regroup and try some solo ventures. They reemerged in 1976 with a successful new album, *Terrapin Station*, under a new record label, Arista. In 1977, the *Grateful Dead Movie* was released, and in 1978 the band toured Egypt. In 1979, Keith Godchaux left the Dead and Brent Mydland replaced him.

The Grateful Dead celebrated their 15th anniversary on June 7-8, 1980 with concerts at the University of Colorado in Boulder and with a series of concerts in San Francisco, New Orleans and New York throughout the year. In the early 1980s, they kept an exhausting schedule, playing some 75 concert dates a year. But even so, ever since their early days in San Francisco, the band has performed benefits as well to fund worthy causes, such as the anti-war movement, Native Americans, Vietnam veterans, world ecology and human service projects. In 1984, they established the Rex Foundation to funnel money to their favorite causes.

Their 20th anniversary year ended with a nationwide TV broadcast of their concert from Oakland Coliseum on December 31, 1985. Jerry Garcia fell into a diabetic coma for five days in 1986 and fans around the world worried. Garcia rebounded and got back on the road with the band in 1987, the same year the Dead did a six-city, sold-out tour with Bob Dylan. Also in 1987, the Grateful Dead's anti-war, pro-environment film, *So Far*, was released. The Dead ended the '80s as one of the top-grossing tour bands in the world.

Keyboardist Brent Mydland died in 1990. Vince Welnick took his place. And the band plays on. The phenomenal success of the Grateful Dead continues in the '90s with no signs of slowing. The Dead could not have done it without the support and devotion of their fans, the Dead Heads. It was Jerry Garcia who had the idea of finding out who the Dead fans were by soliciting names and addresses on an album cover in 1971. The official *Dead Heads Newsletter* resulted in 1972. Over the decades, the Dead Head family has grown, dedicated to following the "golden road of unlimited devotion."

PROTECTING THE ENVIRONMENT

Abuse of the environment is a global problem, but the solution starts with every individual on earth. Threats to our environment range from acid rain to ozone depletion to dwindling natural resources to trash on the highway. You can help protect the environment by showing respect for the earth you travel and the places you visit. Think globally, act locally. You can make a difference. Start today.

Whether you are driving or biking to a Grateful Dead concert or camping out or having a party in the parking lot before or after a concert, be aware of your impact on the environment. Before you leave home, make sure your car or motorcycle is tuned up and running efficiently. A tuned-up engine uses 9% less gasoline. Use unleaded gasoline only. Don't top off your tank at the service station; that releases gas vapors into the environment. Use high-quality, multi-grade motor oil and recycle your oil. Make sure your tires are inflated to the proper amount of air. Observe the speed limit. Turn off the engine if idling for one minute or more.

Using designated campsites, either in private campgrounds or state parks, helps minimize the long-term effects of camping on the land, wildlife feeding areas and watering systems. It is also safer than using undesignated campsites. Use the campsite as it is. Don't dig trenches for your tent. If you clear a sleeping area, replace rocks, twigs and pine cones before you leave. Above all, leave the area as clean or cleaner than when you found it. Carry out every scrap of litter. Wherever you camp, respect the wildlife you see—plants, animals, birds and even insects—and minimize your disruption of their lives.

Be kind to the environment immediately surrounding and within the concert site as well. Drive slowly in the parking lots and be watchful of pedestrians. Do not damage the theater or concert arena in any way. Don't leave trash in the parking lot or theater. The best rule to follow, no matter where you are, is to leave the environment exactly as you found it. That way, everyone can protect and enjoy our planet for a long time to come.
